

## MATLAB / C DRIVERS FOR VRAP-UCB

**Product code: U019**

### ***Product Brief:***

The VRAP-UCB system is the perfect solution for FPGA / ASIC validation engineers whose needs change from the simplest to the most complex verification. Now with the support for MATLAB, we take verification to new heights.

### ***Features:***

1. Supports FPGAs from Xilinx, Altera, Actel\*.
2. Support for MATLAB and C interface. You don't need a simulator to verify your design.
3. Completely compatible with Windows NT/9x.
4. Drive the chip directly from MATLAB or from your C drive
5. Get the result from chip and plot it in MATLAB for verification.

### ***Deliverables:***

1. VRAP- MATLAB 3.1 software on CD-ROM.
2. Documents.

### ***Notes:***

The software, which will be provided with the hardware, will be only for the respective operating system.

\* For further details please contact the factory.

## MATLAB / C DRIVERS FOR VRAP-AEB / PEB

**Product code: U020**

### *Product Brief:*

The VRAP-AEB/PEB system is the perfect solution for FPGA / ASIC validation engineers whose needs change from the simplest to the most complex verification. Now with the support for MATLAB, we take verification to new heights.

### *Features:*

1. Supports FPGAs from Xilinx.
2. Support for MATLAB and C interface. You don't need a simulator to verify your design.
3. Completely compatible with Windows NT/9x.
4. Drive the chip directly from MATLAB or from your C drive
5. Get the result from chip and plot it in MATLAB for verification.

### *Deliverables:*

1. VRAP-MATLAB 4.1 software on CD-ROM.
2. Documents.

### *Notes:*

The software, which will be provided with the hardware, will be only for the respective operating system.

\* For further details please contact the factory.
